

# GEOGRAPHY KNOWLEDGE ORGANISER

## Geography is learning about different people and places.

### Key Vocabulary

continent  
country  
capital city  
sea  
ocean  
similarities  
differences  
atlas  
compass directions  
weather patterns  
equator  
border

### Key Facts

The earth has 7 continents: Asia, South America, North America, Africa, Europe, Australasia and Antarctica.

The earth has 5 oceans: Pacific, Atlantic, Indian, Southern and Arctic.

There is an imaginary line around the centre of the earth called the Equator.

The capital city of Pakistan is Islamabad.

### Lesson by Lesson

1. What is Geography and what do we already know about the location of places. Identify where UK and Pakistan are on a world map and their capital cities.
2. Using weather data describe the seasons and the patterns of both places.
3. Use maps to describe physical features of both places
4. Use photographs of both places to describe human features
5. Create a fact file to describe both places and make comparisons
6. Aided by maps use the compass directions to describe the location of neighbouring countries and seas.

## Why is the weather different in Pakistan to the UK?

The British Flag and London Bridge. The Pakistani Flag & the Minare Pakistan.

Pakistan is in the continent of Asia and has the capital city of Islamabad.

The UK is in the continent of Europe and is made up of 4 smaller countries; England, Northern Ireland, Scotland and Wales. London is the capital city of England.
